1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

1) In the specification, page 1, before the 1st line, following is inserted:

- - This application is a CON of PCT/EP99/03790, filed 05/31/1999. - -

2) In claim 1, last line, after " or in salt form", ",", is deleted.

2. The following is an examiner's statement of reasons for allowance: Rejection of claims under 35 USC 102(b) and 35 USC 103 are hereby withdrawn subsequent to applicants' amendments. The closest prior art is DE 195 31 300, which teach structurally similar compounds as claimed herein. See pages 10-18. The difference between the reference and herein claimed compounds are that there is at least propylene group in herein attached to the carbonyl group as against methylene group in the reference. The reference suggests R1 to be hydrogen, but all of the compounds made have R1 as F. Although, one of ordinary skill in the art would have used hydrogen as substituent for R1 in the reference, there is no suggestion to select at least propylene group for methylene in the reference. Hence claims are patentable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
